Opubliq

Pricing is based on the size of your corpus.

Two charges: a one-time fee to bring your surveys in, and a flat annual fee based on the size of your corpus. Both are counted in variables. One variable is one substantive column of your data, one question you asked. Nothing is charged per user, per search, or per feature. Starting with a single study carries no annual fee (04).

01 Ingestion

We parse each survey from its codebook and data file, then annotate every variable: a readable title, themes and concepts, its response options, and a standard demographic type. That's what makes a question findable across all your studies.

$200 per survey + **$2** per variable

One time, per survey · capped at $2,500 per survey

EXAMPLES

SURVEY SIZE	TYPICAL STUDY	ONE-TIME
40 variables	Short omnibus module	**$280**
200 variables	Standard national survey	**$600**
550 variables	Election study wave	**$1,300**
1,240 variables	Large multi-module study	**$2,500**

Per batch: surveys 6–15 are 20% off, 16–30 are 35% off. Past 30, volume price.

02 Annual plan

One flat fee for the year, based on the total number of variables in your corpus. It doesn't change with how much you use the platform, how many people use it, or how much you ingest during the year.

PLAN	YOUR CORPUS	PER YEAR
Essential	Under 1,500 variables	**$4,000**
Standard	1,500 – 4,000	**$8,000**
Advanced	4,000 – 10,000	**$14,000**
Extended	10,000 – 25,000	**$22,000**
Intensive	25,000 – 50,000	**$32,000**

Only your own studies count toward the threshold. The public corpus is free and doesn't push you into a higher plan. Past 50,000 variables, the plan is quoted.

03 Included in every plan

SEARCH AND ANALYSIS

- Cross-survey search by theme and concept
- Natural-language analysis agent
- Cross-tabs and Excel export
- LLM annotation of open-ended responses

ACCESS

- Unlimited searches and analyses
- Unlimited users across your organization

FROM DAY ONE

- Initial setup and configuration
- Public corpus: 25 surveys, 6,237 variables

Every plan includes all of it. The only difference is how much of your own data is in the system. You can query your studies and the public corpus together in one question.

04 Proof of concept

NO ANNUAL FEE TO START

You can start with a single study.

Send us one survey. We ingest it at the rate above (usually $300 to $1,300) and you get the full platform for 30 days. If you continue, the annual fee starts and that ingestion fee is credited to it.

05 Terms

- Prices in Canadian dollars, before applicable taxes, valid through June 30, 2027.
- Ingestion invoiced per batch on delivery; the annual plan at signature, net 30.
- Studies are live within 10 business days of receiving your files and codebooks.
- Demographics count as variables; weights, identifiers and interview metadata don't. Unstructured sources are quoted separately.
- Annual term, renewed by agreement with 30 days' notice. Your plan changes only at renewal, and only if your corpus size changed.
- Your data stays in an isolated index, hosted in Canada, and is never used to train models.
